Subject: Re: Final Honolulu PA Electronic Copy

Liz,

I just finished going over the maps. If I missed a conversation on them on last weeks call, I apologize. This copy is changed from the ones last received and I don't believe they were attached to earlier correspondence. Here are my comments:

1. Please keep the pane numbers on the map panes. It makes it very difficult to re-order or get a sense of where we are, if somehow the maps get out of order. Its also good to know if we think we are looking at the same thing.
2. Honouliuli Bridge was taken out. Can it be put back in.
3. Where is the Chinatown station pane?
4. The Dillingham Trees are missing from the 2 maps with Dillingham Boulevard, although Dillingham is noted as an affected historic property.
5. The Hoopili station seems to have been deleted in favor or open fields.
6. The Makalapa station still seems to be in the wrong place, unless the City does plan to put it in the middle of Kamehameha Hwy.
7. the maps with all of the stations, and the legend for reading the panes, seems to be missing panes. I go from Kapolei to Salt Lake to Paarl harbor and the maps don't seem to line up.
8. The map with the pane numbers is too large, can it be put into pdf form so it fits on a page.

It is important that we get the maps right.

thanks,

Pua

Subject: Final Honolulu PA Electronic Copy

Good afternoon,

As we mentioned in the email the other day to the consulting parties, FTA thanks you for input and patience with the development of the Honolulu Transit PA.

Please find attached the final version of the PA for you to share with your supervisors. The attachments to the PA may be found at:

Final PA Attachment 1

<https://ftp.pbworld.com/GetFile.aspx?fn=3fbcba1-64ce-465e-844a-d549bc0717bb>

Final PA Attachment 2

<https://ftp.pbworld.com/GetFile.aspx?fn=4b3fbd75-ac5c-46ae-8eb0-3b56e7f70240>

Process for Signing

As we have expressed over the phone and previous emails, we are going to try to execute the agreement as quickly and efficiently as possible by obtaining the signatures from the signatories first and then the invited signatories. As of this time, the plan is to have everyone sign the same document. Faith Miyamoto from the City and County of Honolulu will be coordinating with the Navy and the SHPO in Honolulu to obtain signatures. Once, the PA contains the City's, the Navy's and the SHPO's signature, it will then go to FTA Region 9 for signature and then head to the ACHP for execution of the agreement. Once we receive the ACHP's signature, we will make a copy for ACHP's files and send the original document back to Region 9 to obtain the National Park Service's signature. The National Park Service is a very important invited signatory. After the agreement has all the signatures from the signatories and invited signatories, the agreement will be available in Honolulu for other consulting parties to concur on the document. If requested by a consulting party, the City will make arrangements for them to sign by counterpart signature.

The PA will be circulated with hard copies of all attachments.

Once the PA is executed, FTA will likely very quickly issue a record of decision for the NEPA review of the Project.

We will send out all the final materials to the consulting parties once the agreement is executed and the agreement with all attachments will be made available on the Project website. These materials will include signing instruction for interested consulting parties to become concurring parties. The City has had trouble

with map projections to make the APE available through a Google Earth file format. However, the City is planning on sending the GIS files of the APE to the consulting parties.

Change in PA FTA Contacts

After this email, I am passing over the Honolulu Programmatic Agreement day-to-day responsibilities back to Ted Matley and Ray Sukys in FTA's Region 9 Office. Please contact one of them if you have questions or edits on the PA. For today, since they are out of the office, copy me if you have an urgent concern.

Thank you again for everything,

Liz
